**Mr. Jothish, Junior Health inspector , District leprosy Unit, Thrissur organised awareness class for teachers at 11:00 am in the KG Hall. Ward member Mrs Sukanya also accompanied with Sir. A Class was conducted with the discussion on qualities to be shaped among teachers. According to Sir, Teachers should be influential and capable trainers for students. A teacher can identify the strengths of a child. Sir explained about the symptoms of leprosy. General symptom of leprosy is light coloured or red patches with reduced sensation. The growth of bacteria is very slow. Teachers should impart the knowledge to parents. If we observe any light coloured patches on a child 's body , then we can press on that area with the tip of pen. If there is no sensation to the child, the matter should be shared with parents. It is cured by using the medicine MDT in the initial stage. If it is not paid attention, it will affect the nervous system. Each class teacher should confirm whether any child is having such type of patches on their body or not. The screening report of each class should be sent before 26 th October through mail. Photos of oath taking by students should also be sent.**
